Demo Requirements: For the demo, we will need
- single table,
- 2-3 chairs,
- a poster stand, and
- access to a power outlet.

The setup will include a display of pre-threaded examples, materials — “beads" and string — for participants to create their own, and a poster display. An interactive applet will also be available for participants to visualize routing paths from their input polyominoes.

Space-wise, we need only the room to accommodate the table, seating, and the poster stand.
